

Dear Customer,

As a result of the merger of Budapest Bank Zrt., MKB Bank Nyrt. and Takarékbank Zrt. completed in several stages, Hungary's second largest credit institution, MBH Bank Nyrt. was created as of 1 May 2023 (hereinafter: "Bank"). In order to ensure unified operation and quality customer service, our IT systems will be harmonised.

The unification process involves **IT migration**, which may cause disruptions in the operation of certain services of the Bank on the day of the migration, as well as in the days prior to and following the migration. In order to ensure smooth implementation, MBH Bank will operate according to a partial or full bank holiday schedule **from 12.30 on 29th September 2023 (Friday) until 12.00 on 3rd October 2023 (Tuesday)** on a non-continuous basis.

Transition weekend

For your convenience, digital card use, cash withdrawal via the ATM network, physical debit and credit card purchases at (POS) terminals and merchant card acceptance services (POS, VPOS) will continue to operate during the changeover period without interruption.

It is particularly important that you are prepared for the possibility of using certain services for a limited period or in a limited way during the transition period in order to minimise any inconvenience. For example, you may experience disruption in the opening hours of our branches, in accessing our electronic channels and instant transfer orders, both in terms of sending and receiving, during the changeover.

Updated information on using the services and details of the transition will be available on our website: <https://www.mbhbank.hu/fuzios-hirek-vallalatoknak-mkb/atallasi-hetvege>. Please carefully read the information published on the website.

Information on phishing

Attempts at phishing generally involve deceptive emails, phone calls or SMS messages in an attempt to extract information from victims, typically user names, passwords or bank card details. If fraudsters access your bank passwords and codes, they can use them to initiate bank transactions. We would like to draw your attention to the fact that in connection with the changeover, the number of phishing attempts may increase. Here are some useful tips to help you avoid falling victim to such attacks.

- Banks never send emails that require customers to log in immediately or that demand urgent action, such as threatening to block accounts or electronic channels!
- Banks never ask customers to install any software or application (such as a virus scanner) on their device.
- Banks never ask for the customers' bank card details or internet bank IDs, either electronically or via their call centre.
- What can you do to ensure your own security?
 - Never use a browser (e.g. Google, Bing) to find the bank's website. Always type the bank's web address into your browser.
 - Check the address in the address bar of your browser, and if it does not end in ".hu", close the browser immediately.
 - Always read the SMS message you receive containing the authorisation code and check what you are giving your approval for.
 - Even for authorisations via an application, always check the transaction or modification to be signed.
 - If you are unsure about the messages you have received from the bank (you did not initiate the particular transaction or app installation), contact the bank's call centre immediately.
